

SMALL Energy Efficiency

Home Upgrades

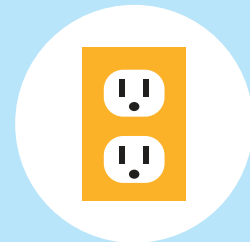

Look for this symbol when shopping. The ENERGY STAR® symbol is the internationally recognized and trusted mark of high efficiency. The symbol means that a product is certified as energy efficient.

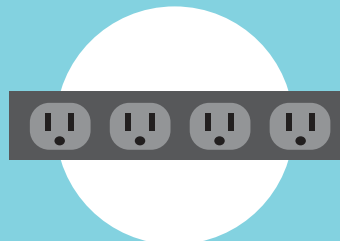

Install insulating blinds, Curtains or plastic film.
You not only save heat, but this can help cool in the summer.

Replace lighting with LEDs.
They use at least 75% less energy, and last 25 times longer, than incandescent lighting

Insulate switches And plugs on outside walls.
The small air gaps around electrical boxes on exterior walls and ceilings leak more air than you might imagine.

Install a smart or programmable thermostat.
By controlling when you raise and lower temperatures, you can greatly reduce your furnace fuel.

Use advanced power bars (strips) at computer stations and entertainment centres. *This will eliminate phantom loads. Typically saves enough energy to pay for itself in the first year.*

Repair leaky Faucets.
Save on water and heating.

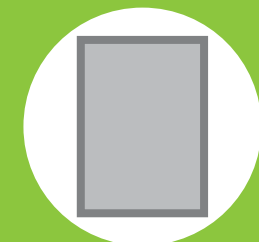

Repair weather-stripping to windows and doors.

Install a rain barrel.
Reduce the amount of municipally treated water you use for gardening or outdoor activities. Your plants will benefit too!

Replace Furnace filters.
If it runs efficiently it uses less energy!
