

Cabin Solar Power Up Instructions

1 Turn on the Solar Disconnect (3 switches)

PULL UP

2 Turn on the Power Controller

PULL UP

3 Turn on the Battery Disconnect

PULL UP

4

Wait 2 minutes. Turn on the **Power Inverter** by pressing the green button for 1 second

5

The system is now producing 120v AC power. Plug your cabin extension cord into the outlet.

Shut Down Instructions

WINTER

Turn OFF the Power Inverter ONLY

DO NOT SHUT DOWN ANY OTHER SWITCHES

THIS IS IMPORTANT BECAUSE:

- It keeps the batteries charged.
- It prevents batteries from freezing in winter.

If cabin is used during winter:

- Turn the INVERTER ON when you arrive.
- Turn the INVERTER OFF when you leave.

FREEZING WILL RUIN THE BATTERIES

SUMMER

DO NOT SHUT DOWN ANY SWITCHES

THIS IS IMPORTANT BECAUSE:

- It keeps the batteries charged.
